TIPA WORLD AWARDS 2024 BEST PHOTO PAPER

Hahnemühle Baryta FineArt & Photo Papers

[« BACK TO AWARDS LIST](#)

The Hahnemühle inkjet printing paper lineup continues to expand and with each new entrant comes newfound creative options. These new papers are in the Baryta family, renowned for their look, feel, and richness of surface that matches high quality silver halide prints. All are in the medium/heavy range (slightly above 300gsm) and can be used in most quality inkjets without special platen settings. Bamboo Gloss Baryta, part of the company's "sustainable" group, is made with 90% bamboo fibers. It's a warm tone, high gloss paper that delivers rich contrast and wide tonal range. Photo Rag Matt Baryta delivers vivid colors and deep blacks with sharpness and clarity. The Photo Silk Baryta X paper has been optimized for inkjet printing with a smooth white look and a silky gloss finish.
