

Don't Trust Your ~~Prints~~ To Anything Else Art

Premierart canvases and coatings are specifically designed for image permanence, resistant to premature yellowing and allows canvases to be stretched without cracking.

PREMIER FINE ART GENERATIONS SATIN CANVAS:

- Poly/cotton canvas base
- Excellent stretching properties and added strength.
- Highest D-Max of any canvas product available in the market today.
- Compatible with Epson, HP and Canon aqueous based pigment inks

PREMIER ART ECO PRINT SHIELD COATINGS:

- Ideal for coating canvas
- Will not yellow or crack when stretched. Protects against light, humidity, abrasion and fingerprints
- Wilhelm Imaging Research tested
- Increases the WIR Image Permanence Ratings on media printed with Epson UltraChrome inks.

PROUDLY DISTRIBUTED BY

Professionally Finishing inkjet prints for maximum beauty and image permanence, offers different challenges to that of silver halide printing.

We at IPS are happy to advise our customers of the best solutions, whatever their needs.

Exclusively Distributed in Australia & New Zealand by Independent Photographic Supplies P/L
