Bringing Permanence to the Digital World

PremierArt™ is the Solution

PremierArt Coatings

Protect and extend the life of your ink jet prints. Our protective coatings have been rated to over double the life of an image.¹

ECO Print Shield

This ecologically friendly coating is non-yellowing, water resistant, and will not crack when stretched! Certified by Wilhelm², Validated by HP and approved by Epson. Available in:

- Gloss
- Satin
- Matte

Print Shield

This clear spray will not change the look of the print. This lacquer based coating is non-yellowing, protects from scuffing, fingerprints, atmospheric contaminants and even water. Certified by Wilhelm² and approved by Epson.

PremierArt Fine Art Media

The art papers are alkaline buffered and acid free. The canvases are 2:1 double weaved for durability.

- Smooth Fine Art paper
- Velvet BW Fine Art paper
- Platinum Rag Fine Art paper
- Watercolor paper
- Canvas: Glossy, Matte and Smooth Matte

Our coatings are certified by Wilhelm², Epson, and HP, and the media is made to stand the test of time. Welcome to PremierArt's new world of digital permanence, where we've made a lifetime commitment to you.

EPSON
EXCEED YOUR VISION

Visit www.premierart.info for more information!

¹ When used with today's popular long life pigmented ink sets with standard indoor display conditions and when properly framed under glass. Results will vary with ink used. Actual prints stability will vary according to display conditions, light intensity, humidity, framing and atmospheric conditions. Premier Imaging Products does not guarantee longevity of prints. ² Tests conducted on select PremierArt media with Epson UltraChrome™ and UltraChrome K3™ ink. Actual results are listed at www.wilhelm-research.com. WIR seal is a registered trademark of Wilhelm Imaging Research. Epson, Ultrachrome and UltraChrome K3 are registered trademarks of Seiko Epson Corp. HP is a registered trademark of Hewlett-Packard Company.
